WHAT WE CAN DO

WHY US

With over 25 years of experience in traceability and identification, we are the partner for your digital transformation.

Software development

We provide software solutions to help you optimize traceability and physical business flow. Whether you are looking to improve your stock management processes, track goods or components, facilitate inventory, our solutions will meet your business needs.

Technology expert

Thanks to our knowledge, practical experience and technological watch, we can address your need with the best technology for your use case. All client and set up are unique for us. We work with identification technologies such as RFID, Bluetooth, Blockchain and 1D/2D codes.

Hardware, supplies and support

We advise you and provide you with the necessary equipment for your business, from electronic equipment to your printing needs. We also ensure that the infrastructure is available in operational conditions and that it is maintained once it has been put into service.

Founded in 1998, we are specialized in autoID and traceability solutions. With teams dedicated in consulting, software development, projects management, hardware sourcing and support, we simplify your daily work.

With our unique Software platform, we offer powerful tools to address any industry needs. Our experts' team will understand your business need and provide you the best solution and set up. The use of new technologies contributes to the simplification of many tasks and allows for a better automation of processes. That is why we analyse your requirements, work with you to find the best possible implementation and support you in its deployment.

For us a project starts with user requirements but it only finishes with user satisfaction.

MOBILE APP

Most of our solutions comes along with a mobile application to facilitate field operation and information sharing.

WEB PORTAL

Throughout the web portal of our solutions, you have a global vision of your goods and flows to manage your activity to the best.
